

Nasdaq-100, after Irish tax.

Individual shares versus an accumulating ETF under the modelled Irish tax rules.

HIGHEST SELECTED RESULT

€998,425

**Sell losses weekly;
sell and rebuy current stocks
in December**

+€247,696

versus the ETF

+€45,806

versus the stock baseline

After liquidation, taxes and costs.

Hold the ETF

Fund tax on gains, including eight-year deemed disposal.

€750,729

Buy index shares; keep stocks that leave

No voluntary sales before the final sale of everything.

€952,619

Sell losing shares each month

Sell eligible losses; no December sales to use the exemption.

€988,601

Sell losses monthly; sell former index stocks first in December

Then sell and rebuy eligible current stocks to use remaining exemption.

€994,222

Sell losses weekly; sell and rebuy current stocks in December

Sell at a covered profit; rebuy to reset the purchase cost for future CGT.

€998,425

All three active stock strategies: review former index stocks quarterly; sell only when the sale adds no CGT.

December profit sales use existing losses first, then the remaining €1,270 exemption. Eligibility limits apply.

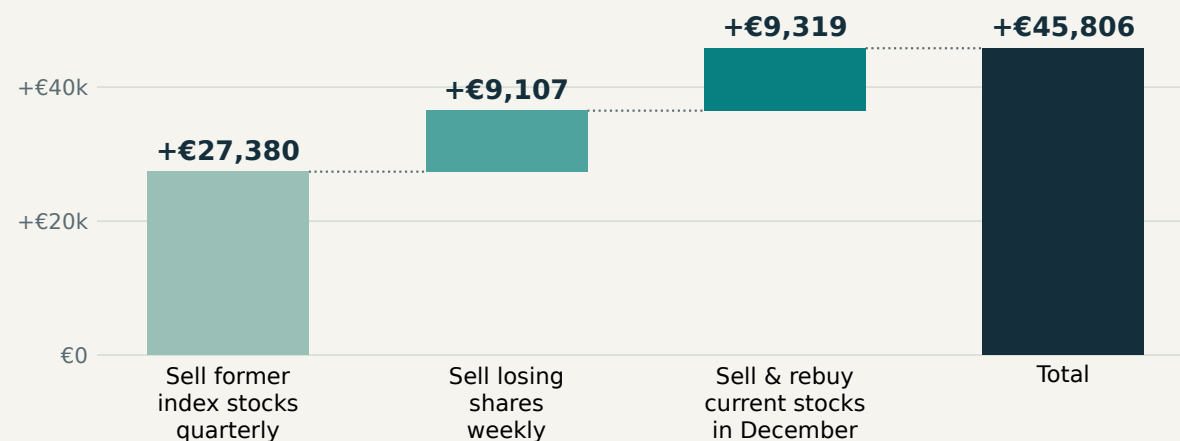

€210,936.48 invested / 192 payments / 16 years. Nominal wealth; differences include holdings, costs and tax.

Where the gains came from.

Change one rule at a time; compare complete portfolios after all taxes and costs.

THE WEEKLY STRATEGY, BUILT IN THREE STEPS

€952,619 → €998,425

ALTERNATIVE: CHECK LOSSES MONTHLY

+€8,602: sell losses monthly. Then +€5,621:

sell former index stocks first in December; then sell & rebuy current stocks.

THE ANNUAL EXEMPTION: OFF → ON

Weekly loss sales; December sell & rebuy

+€13,243

change in final wealth

Nominal exemption relief: €6,368

Monthly loss sales; former stocks first

-€700

change in final wealth

Nominal exemption relief: €6,787

The three steps add because each builds on the previous rule. The exemption cards are separate experiments.

Wealth effects include holdings, costs and reinvestment. Nominal relief is exempt gains × 33%.

Loss and gain harvesting interact: effects measured against different controls cannot simply be added.

How the strategies traded.

The leading strategy uses three scheduled reviews, with no foresight of later prices or losses.

01 / EVERY FRIDAY

Sell losing shares

Sell a whole holding at $\geq 5\%$ and $\geq \text{€}25$ loss.
No buy of that share class in prior 29 days;
block repurchase for 29 days afterwards.
Reinvest in other current index stocks.

02 / EACH QUARTER

Sell former index stocks

Sell when existing losses and remaining
exemption cover the gain without extra
CGT. Keep other departed holdings.

03 / EACH DECEMBER

Sell and rebuy at a profit

Sell eligible current stocks; buy them back.
Use existing losses, then the remaining
€1,270 exemption, to cover gains. Oldest
shares sell first; no losing lots; fees apply.

Monthly alternative: sell losses monthly. In December, sell former index stocks first; then sell and rebuy current stocks.

Three rules that fell behind.

PREVIOUSLY WEAK RULES, REPLAYED

SHORTFALL VS CONTROL

WHAT CHANGED

Sell even tiny losses (from €1)

—€22,369

1,403 loss sales vs 424;
fees and holdings changed.

Keep stocks that leave the index

—€26,624

Kept former constituents;
lower tax, lower final wealth.

Sell and rebuy profitable shares monthly

—€37,500

720 gain sales vs 198;
the annual allowance stayed fixed.

Controls: sell former stocks quarterly; sell/rebuy current stocks each December. Monthly loss sales for rows 1/3; none for row 2.

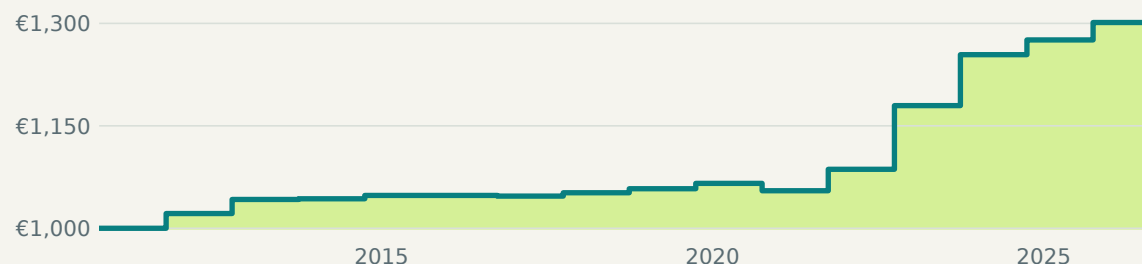

What the comparison assumes.

Same scheduled funding. Frozen tax scenarios. A provisional historical reconstruction.

CONTRIBUTIONS FOLLOW IRISH CPI

€1,000.00 → €1,301.28

Per month / €210,936.48 contributed over 16 years

Each September: €1,000 × August CPI ÷ August 2010 CPI.

Published data only; increases and decreases apply.
Same scheduled flows; three stock deposits post next session.
CSO CPI: December 2006=100; current, non-revised series.

THE TAX SCENARIO

33%

STOCK CAPITAL GAINS

€1,270

ANNUAL CGT EXEMPTION

52.35%

DIVIDEND TAX

38% / 8y

FUND TAX / DEEMED DISPOSAL

No unrelated gains consume the allowance.

READ THE RESULTS AS A BACKTEST

Strategies were selected retrospectively, not out of sample.
Weights, membership and corporate actions remain provisional;
some holdings use nontradable marks. Wealth is nominal.

Research only. Not tax, legal or investment advice.
